

CASE STUDY FOURTEEN: "TUBING" A COW

4 Points

The cow pictured in Figure 16-14 is about to receive mineral oil. Identify the silver equipment/instrument seen in the animal's mouth. State the technical term for placing a tube through the mouth into the stomach. Identify means of determining correct tube placement. (Confirming that the tube is in the esophagus not the trachea.)

Figure 16-14 Tubing a cow

CASE STUDY FIFTEEN: BIRD BLOOD DRAW

4 Points

Identify the vessel from which blood is being drawn in Figure 16-15. Describe the primary differences seen in avian RBC as compared to mammalian RBC. Identify the equipment required to perform blood collection from this location.
